## Professional Summary

---

I am a Computer Engineering student at GEC Rajkot, set to graduate in 2026. I am dedicated to leveraging technology to develop real-world solutions. As a strong team player, I have a passion for innovation and problem-solving, and I am eager to contribute to dynamic projects in the field.

## Education

---

### Government Engineering College Rajkot

Computer Engineering-BE

2022–2026

CGPA: 8.22

### Nilkanth Vidhyalaya, Limbdi

Higher Secondary (HSC)

2022

76.66%

### Nilkanth Vidhyalaya, Limbdi

Secondary School (SSC)

2020

80.50%

## Projects

---

### FOOD HUT — React, HTML, CSS, JavaScript, Swiggy's Live API .....

- An online food delivery website developed using REACTJS, HTML AND CSS.
- The website fetches live data from Swiggy's API to display a wide range of restaurant options to users.
- Designed intuitive interfaces with CSS and shimmer(skeleton) UI, prioritizing user experience.
- Ensured secure data transmission with a keen understanding of cross-origin access.
- Implemented Cross-Origin Resource Sharing (CORS) to securely fetch data from external sources.
- It features dynamic content rendered through React.js and a responsive design crafted with HTML and CSS for seamless use across various devices.

### Portfolio — HTML, CSS, ReactJs, AOS.....

- A fully dynamic and responsive portfolio showcasing my skills and expertise in web development
- Built using HTML, CSS, and React for a fast and efficient user experience
- Utilized AOS library to create stunning animations and scrolling effects
- Designed to be highly interactive and engaging, with features such as hover effects and scrolling animations
- Optimized for various devices and screen sizes, ensuring a seamless user experience
- A testament to my passion for web development and my ability to create immersive and interactive experiences

## Technical Skills

---

**Languages:** JavaScript, HTML, CSS, Python, Java

**Frameworks:** React, Tailwind CSS

**Databases:** MySQL

**Tools:** VS Code, Git, GitHub
